PROFILE

Fresh graduate in Informatics Engineering with a GPA of 3.96/4.00, with a strong interest in Full-Stack Web Development. Experienced in building end-to-end web applications using Python, PHP, and JavaScript/TypeScript, covering both frontend interfaces and backend systems. Strong communicator and proven leader with hands-on project delivery experience across multiple real-world web applications.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, Bootstrap 5, Tailwind CSS, React.js

Backend: PHP (Laravel), Python (Django, Flask), Node.js (Express.js)

Languages: JavaScript, TypeScript, Python, PHP

Tools & Others: Microsoft Office (Word, PowerPoint), Git, MySQL

EDUCATION

Universitas Budi Luhur (Sepetember 2022 – January 2026)
Sarjana Teknik Informatika
Programming Expert | **GPA : 3.96 / 4.00**

WORK EXPERIENCE

Teacher Coding & Robotics (Part-Time) (December 2025 – Present)
Codero Education

1. Taught web development fundamentals (HTML, CSS, JavaScript) and Python programming to middle and high school students with a project-based learning approach.
2. Designed structured learning materials, practical modules, and assessment rubrics tailored to each age group's learning pace.
3. Mentored students through end-to-end mini project development, from ideation to final implementation and presentation.

Web Developer – Independent Study (Sepetember 2024 – December 2024)
Educourse.id — Specialist Education Platform

1. Developed a full-featured e-learning platform ('RPLearn') with end-to-end responsibility across frontend (Bootstrap 5, JavaScript) and backend (Django), delivering a responsive and seamless user experience.
2. Implemented core modules including user authentication, course management, and content delivery system aligned with detailed system requirement specifications.
3. Participated in agile sprint cycles sprint planning, code reviews, iterative development and produced comprehensive technical documentation for future maintainability.

PROJECT EXPERIENCE

University Chatbot — Multinomial Naive Bayes & KNN | Python (Flask) & React.js (November 2025 –January 2026)
Universitas Budi Luhur

1. Built a full-stack chatbot application with Python Flask REST API backend and React.js frontend, enabling real-time intent detection and dynamic response delivery.
2. Designed and implemented a complete NLP preprocessing pipeline (cleaning, case folding, slang normalization,

stopword removal, tokenization, stemming with Sastrawi) and TF-IDF feature weighting to classify 43 user intent categories.
3. Developed Multinomial Naive Bayes and KNN classification models and integrated them into the web application to accurately answer diverse university-related queries.

Expert System for Sports Injury Diagnosis | PHP (Laravel) (May 2025 – June 2025)
Bebas Cedera
1. Built a full-stack web application with role-based authentication (admin & user), dedicated dashboards, and a CMS for managing disease records and symptom mappings.
2. Engineered a real-time injury diagnosis engine using the DFS algorithm to traverse symptom-disease relationship trees, integrated with diagnosis history tracking and server-side pagination.

Mining Product Sales Prediction | Python (Django) (December 2024 – February 2025)
PT Central Pacific Development
1. Developed a full-stack dashboard for uploading, managing, and analyzing Excel-based sales data, with automated monthly aggregation for time-series modeling.
2. Integrated a Backpropagation ANN forecasting engine with interactive visualization of training loss and actual-vs-predicted sales values.

Online Library Management System | PHP (Laravel) (September 2024 – October 2024)
SMK Arif Rahman Hakim
1. Architected a multi-role system (admin & member) with full borrowing lifecycle management: request approval, automated fine calculation, and payment receipt upload.
2. Integrated an in-browser book reading feature using the HTML5 Canvas API, allowing users to read digital books directly within the application.

Product Association Analysis (Apriori) | PHP (Laravel) (June 2025)
Coffe Tege
1. Built a full-stack Market Basket Analysis platform with bulk XLSX data import, an Apriori-based association rule engine, and one-click PDF report export for business decision-making.

LEADERSHIP & VOLUNTEER EXPERIENCE

President – Gema Luhur University Choir (March 2024 – May 2025)
Universitas Budi Luhur
1. Led organizational strategy, rehearsal coordination, and stakeholder communications for a 40+ member ensemble.

President – University General Election Commission (KPU) (December 2023 – February 2024)
Universitas Budi Luhur
1. Supervised 35 coordinators to execute a university-wide election upholding Luber Jurdil principles; managed full electoral operations from registration to result announcement.

CERTIFICATIONS

1. Certificate of Basic Computer Algorithm Competency
2. Certificate – Workshop: Learn About SQL Map on Kali Linux for Database Security
3. Certificate – Web Developer and Platform (Specialist Education Platform) – Educourse.id
4. Certificate of Python Course Completion
5. AI Productivity and AI API Integration for Developers – Hacktiv8
