PROFESSIONAL SUMMARY

Fresh Graduate in Informatics Engineering (GPA 3.96/4.00) with hands-on experience in enterprise software development through the BIBIT Internship Program at Bank Syariah Indonesia. Experienced in developing scalable web applications, RESTful APIs, database solutions, and business process automation using PHP, Spring Boot, Next.js, Python, MySQL, and Oracle Database. Strong analytical, problem-solving, and teamwork skills with a passion for backend and full-stack development.

TECHNICAL SKILLS

Programming Languages: Python, PHP, JavaScript, TypeScript, Java

Frontend: HTML5, CSS3, Bootstrap 5, Tailwind CSS, Next.js

Backend: Laravel, Django, Flask, Express.js (Node.js), Spring Boot

Database: MySQL, PostgreSQL, SQLite

API & Architecture: REST API Development, MVC Architecture

Tools & Development: Git, Microsoft Office, Laragon, Postman, Docker

Other: Technical Documentation, System Analysis, Hardware/Software Troubleshooting

EDUCATION

Universitas Budi Luhur

September 2022 – January 2026

Bachelor of Informatics Engineering (Sarjana Teknik Informatika)

GPA: 3.96 / 4.00 | Programming Expert

WORK EXPERIENCE

Human Capital Technology & Information Staff (BIBIT Internship Program)

December 2025 – July 2026

Bank Syariah Indonesia

- Contributed to the development and maintenance of SIKAD (Sistem Informasi Kriya & Alih Daya), an enterprise Human Capital Information System serving 30,690+ users across Bank Syariah Indonesia.
- Developed and enhanced HR modules using PHP Native, JavaScript, jQuery, HTML, CSS, and MySQL, supporting business processes such as Business Trip, Payroll, Overtime, Attendance, Leave, Registration, Dashboards, and Reporting.
- Built and optimized HR operational features for 11,500+ outsourced employees (TAD, BIBIT, and Kriya), including Manpower Planning, Overtime Extra, employee administration, and reporting modules.
- Designed and optimized MySQL database objects, including tables, indexes, stored procedures, scheduled events, and SQL queries, while improving transaction integrity and application performance.
- Developed a Python-based Microsoft Teams Automation Bot for HC Connect, automating personalized HR notifications and reducing manual communication efforts.
- Contributed to the development of SIPP (Sistem Informasi Pendaftaran dan Penghargaan) using Spring Boot, Next.js, and Oracle Database, developing backend APIs, frontend modules, and database integration.
- Built internal productivity tools, including a Python-based PDF Compressor and Python + Pandas utilities for HR data processing, validation, cleansing, and migration.

Coding & Robotics Teacher (Part-Time)

December 2025 – July 2026

Codero Education

- Deliver engaging instruction in web development (HTML, CSS, JavaScript) and Python programming to middle

and high school students through a project-based learning methodology.

- Develop structured curricula, practical training modules, and assessment rubrics aligned with each age group's learning objectives.
- Guide students through the complete project lifecycle — from concept development to final implementation and presentation.

Web Developer – Independent Study

September 2024 – December 2024

Educourse.id (Specialist Education Platform)

- Designed and developed RPLearn, a full-featured e-learning platform with end-to-end ownership of both frontend (Bootstrap 5, JavaScript) and backend (Django) components.
- Implemented core system modules including user authentication, course management, and a content delivery system in accordance with detailed technical specifications.
- Engaged in agile sprint cycles — encompassing sprint planning, code reviews, and iterative development — and authored comprehensive technical documentation to support future maintainability.

PROJECT EXPERIENCE

SIKAD (Sistem Informasi Kriya & Alih Daya)

April 2026 – Present

Bank Syariah Indonesia

- Contributed to the development and enhancement of SIKAD, an enterprise Human Capital Information System serving 30,690+ users across Bank Syariah Indonesia.
- Developed and maintained HR modules using PHP Native, JavaScript, jQuery, HTML, CSS, and MySQL, supporting Business Trip, Payroll, Attendance, Leave, Overtime, Registration, Dashboards, and Reporting.
- Built operational features for 11,500+ outsourced employees, including Manpower Planning, Overtime Extra, employee management, and reporting.
- Optimized MySQL database performance through query tuning, indexing, stored procedures, and scheduled events while improving transaction integrity.
- Collaborated with cross-functional teams to deliver scalable solutions that enhanced HR operational efficiency and user experience.

University Chatbot – NLP Intent Classification

November 2025 – January 2026

Universitas Budi Luhur

- Developed a full-stack chatbot application using Python Flask (REST API) and React.js, enabling real-time intent classification across 43 user intent categories.
- Engineered a complete NLP preprocessing pipeline (tokenization, stemming via Sastrawi, TF-IDF feature extraction) and trained Multinomial Naive Bayes and K-Nearest Neighbor classification models.

Mining Product Sales Prediction Dashboard

December 2024 – February 2025

PT Central Pacific Development

- Developed a full-stack Django dashboard for uploading, managing, and analyzing Excel-based sales data, with automated monthly aggregation to support time-series forecasting.
- Integrated a Backpropagation Artificial Neural Network (ANN) forecasting model with interactive visualizations of training loss and predicted-versus-actual sales performance.

Online Library Management System

September 2024 – October 2024

SMK Arif Rahman Hakim

- Architected a multi-role platform (admin and member) supporting a full borrowing lifecycle — including request approval, automated fine calculation, and digital payment receipt upload.
- Implemented an in-browser digital book reader using the HTML5 Canvas API, enabling users to access library content directly within the application.

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

President – Gema Luhur University Choir

March 2024 – May 2025

Universitas Budi Luhur

- Directed organizational strategy, rehearsal scheduling, and stakeholder communications for a 40+ member performing ensemble.

President – University General Election Commission (KPU)*December 2023 – February 2024*

Universitas Budi Luhur

- Oversaw a team of 35 coordinators in executing a university-wide democratic election adhering to the Luber Jurdil principles; managed all electoral operations from candidate registration through to official result announcement.

CERTIFICATIONS

- Certificate of Basic Computer Algorithm Competency
- Workshop Certificate: SQL Map on Kali Linux for Database Security
- Web Developer and Platform Certificate – Educourse.id
- Python Programming Course Completion Certificate
- AI Productivity and API Integration for Developers – Hactiv8
- Belajar Dasar Pemrograman JavaScript – Dicoding
- Belajar Back-End Pemula dengan JavaScript – Dicoding
